

Special Session

Women in RFID - Scenarios, applications, and practical solutions

SESSION ORGANIZERS

Dr. Johanna VIRKKI (johanna.virkki@tuni.fi), Tampere University, Finland

Dr. Mirka LEINO (mirka.leino@samk.fi), Satakunta University of Applied Sciences, Finland

Prof. Sari MERILAMPI (sari.merilampi@samk.fi), Satakunta University of Applied Sciences, Finland

ABSTRACT

Women in technology and engineering sciences are still less visible than men, although they carry out significant work in these areas. This session explicitly acknowledges and popularizes the great research and development work done by women in the field of RFID. We invite all women in RFID to introduce scenarios, applications, and practical solutions implementing RFID to benefit, for example, industrial cost-effectiveness and processes, well-being of people, and functionality of the society.
